

include/webcraft/async  
/io/adaptors.hpp

```
graph BT; A["include/webcraft/async<br>/io/adaptors.hpp"] --> B["include/webcraft/async<br>/io/io.hpp"]; B --> C["include/webcraft/async<br>/async.hpp"];
```

The diagram illustrates a vertical flow of include dependencies. At the top is a grey box containing the file path 'include/webcraft/async /io/adaptors.hpp'. A blue arrow points upwards from a white box below it, which contains 'include/webcraft/async /io/io.hpp'. Another blue arrow points upwards from a second white box at the bottom, which contains 'include/webcraft/async /async.hpp'. This indicates that 'adaptors.hpp' depends on 'io.hpp', and 'io.hpp' depends on 'async.hpp'.

include/webcraft/async  
/io/io.hpp

include/webcraft/async  
/async.hpp
